Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms and backend development using Node.js and Express.js. Skilled in building dynamic web applications, designing scalable backend systems, and solving real-world engineering problems using modular and efficient approaches.

Skills

- **Languages:** Java, JavaScript, Python Basics
- **Frontend:** HTML, CSS, JavaScript, Bootstrap, EJS
- **Backend:** Node.js, Express.js, REST APIs, Routing, Server-side Logic
- **Core:** Data Structures & Algorithms, OOPs, Time & Space Complexity
- **Tools:** Git, GitHub, MongoDB Atlas, Cloudinary

Education

Lloyd Institute of Engineering and Technology	2024 – 2028
B.Tech in Computer Science Engineering	SGPA: 8.0
Shanti Mission Academy	2024
Class XII (CBSE) – 70%	
Shanti Mission Academy	2022
Class X (CBSE) – 86.6%	

Projects

Wanderlust – MERN-Based Property Rental Platform	MERN Stack
Tech Stack: MongoDB, Express.js, Node.js, EJS, Bootstrap, Cloudinary	
• Developed a full-stack property rental platform using MongoDB, Express.js, and Node.js • Implemented secure user authentication and authorization • Added CRUD operations for property listings and reviews • Integrated image upload and cloud storage functionality using Cloudinary • Built responsive user interfaces using EJS templates and Bootstrap • Designed RESTful APIs for frontend-backend communication	
Weather Forecast Web App	JavaScript, Node.js, API
• Developed a weather application using OpenWeather API • Displayed real-time weather data based on city search • Built responsive UI using HTML, CSS, and JavaScript	

Achievements

- Solved Data Structures and Algorithms problems on coding platforms
- Participated in coding contests and technical hackathons

Certifications

• C++ Essentials	2025
Learned OOP, STL, memory management, and problem-solving techniques using C++.	
• Cybersecurity Essentials	2026
Gained knowledge of network security, encryption techniques, cyber threats, and security practices.	
• Data Structures and Algorithms	2025
Practiced arrays, linked lists, stacks, queues, and algorithmic problem solving.	
• Java Programming Fundamentals	2026
Covered OOP, exception handling, collections, and Java application development.
